

Assumptions

- The application only works online/internet required
- The application reads the database of all employees from cloud which is being managed by Database Administrators in employee directory at cloud (future work - only dummy data will be used for demo purposes)
- The application will be just a prototype to deliver the basic concept
- The prototype will be available on a URL by which any user can use the application by accessing the URL
- The prototype targeted device is Apple iPhone XS only - dummy screens would be used
- The prototype will follow all of the upcoming assumptions which will be mentioned in final documentation
- The prototype will have a notification management systems as well to keep user updated
